Loyola University Chicago (2011–2014)
Bachelors of Arts, Communications
Minors: Music, Psychology
Concentrations: Women & Gender Studies
3.88 GPA
Magna Cum Laude

PROJECTS//

Augmenu | Developer |(March 2018 – Present)
https://github.com/augMenu/augMenu2
A mobile application that allows users to preview their food items from a menu in augmented reality.
✕ Stack: React Native, Viro React, AWS S3, Google Cloud Vision API
✕ Created 3D models using qLone.
✕ Implemented logic for sending the menu item image to our text-recognition API and sending that data to AWS to render the food items.

Mystique Boutique | Developer |(March 2018 – Present)
https://mysti-bouti.herokuapp.com/
A single page ecommerce application that allows users to create an account and buy magical items.
✕ Stack: React, React-Redux, Express, Sequelize, Bootstrap, Mocha and Chai
✕ Designed and implemented the order form for users to checkout and confirm their order.
✕ Implemented backend logic for a users cart items. Transfers cart items to their order whether or not they are a logged in user at the time of the order.

View Your Times | Developer |(March 2018 – Present)
https://viewyourtimes.herokuapp.com
A single page application that displays the day's news on a global map and can take you to the full NY Times story.
✕ Stack: React, React-Redux, NYTimes Top Stories API, Highmaps API & Javascript
✕ Wrote logic to filter NY Times article data by a specific country and render it on our map rendered with Highmaps. Additionally added logic to click through from the map to more articles.
✕ Implemented CSS styling for both our React components and our map.
